Dr. William Clark

Dr Clark has 50 years experience in orthodontic practice and continues to develop innovative appliances.

He has designed and tested a new range of fixed lingual appliances for arch development to achieve amazing changes in arch form using 'patient friendly' invisible lingual appliances. Trans-Force appliances achieve for arch development equivalent improvements that Twin Blocks achieved for functional therapy.

Dr Clark is the first recipient of an award of distinction from the British Orthodontic Society for an outstanding contribution to the specialty of orthodontics. In 2008 he received the first award from the International Functional Association.

In 2010 he completed a thesis on "New Horizons in Orthodontics & Dentofacial Orthopaedics". He received an honorary fellowship award from the Royal College of Surgeons in England.

The Twin Block Technique

Dr. Clark developed the Twin Block in 1977, and it is now the most widely used functional appliance throughout the world. Twin Blocks are comfortable and aesthetic, and are designed for full time wear. The appliances are „patient friendly“ and consistently correct severe malocclusion with dramatic improvements in facial appearance.

This presentation is „state of the art“ in functional orthopaedics. It includes a full account of the fitting and clinical management of Fixed Twin Blocks.

- Simplify construction and management of Twin Blocks using a kit with preformed components.
- Preformed occlusal blocks covering occlusal, lingual and buccal surfaces
- Clear blocks and material to customize on models for aesthetic appliances
- Preformed lingual wires to link the blocks with minimal interference to speech and comfort.
- Adjustable for arch expansion.
- Fixed or Fixed/Removable for improved control of patient compliance
- Integrates with fixed appliances

An effective approach to Class II orthodontic correction using invisible appliances, including powerpoint presentation, video and morphed images to demonstrate the products.

OrthoForce System

The OrthoForce System presents a comprehensive approach to orthodontic treatment for correction of all classes of malocclusion using innovative appliances demonstrating Advances in Fixed Appliance Therapy.

Invisible appliances represent a revolution in orthodontic technique.

- Transforce Lingual Appliances for interceptive treatment from mixed dentition to adult therapy
- Carriere Motion to simplify treatment of Class II and Class III malocclusion
- Carriere SLX Brackets for State of the Art finishing
- Reduce treatment time with efficient new appliance systems

Carriere Motion

This exciting new technique simplifies the correction of Class II and Class III malocclusion with outstanding results showing dramatic improvements in facial appearance and treatment to the highest standards using the Carriere SLX bracket system.

Freitag, 26. Mai 2017, 09:00 - 17:00

09:00 - 17:00 *Dr. William Clark*

10:15 - 10:45, 14:30 - 15:00 Kaffeepause mit Dentalausstellung

12:00 - 13:00 Mittagspause mit Dentalausstellung

Freitag, 26. Mai 2017 ab 19:30

Gemeinsames Abendessen im Thermen und Vitalhotel Bad Tatzmannsdorf

Samstag, 27. Mai 2017, 09.00 - 17.00

09:00 - 17:00 *Dr. William Clark*

10:15 - 10:45, 14:30 - 15:00 Kaffeepause mit Dentalausstellung

12:00 - 13:00 Mittagspause mit Dentalausstellung

16 ZFP-Punkte für beide Tage

VERANSTALTUNGSORT:
